## **Introduction**

There are 5 town centres in the Borough: Balham, Clapham Junction, Putney, Tooting and Wandsworth. Surveys of all the town centres have been carried out on a biennial basis since 1988. The last survey was carried out in 2016. The survey collected information on all ground floor units within the protected frontages in the town centres. Details of the occupier, use and use class were collected enabling changes in the number of units and use class to be monitored over time. The town centre boundaries used in this report include all the shopping frontages as set out in the Council's adopted Local Plan, 2016.

The information is broken down into Core Shopping frontages, Secondary Shopping frontages and protected Other frontages. This format enables the role of each shopping frontage to be monitored. Protected Core Shopping frontages are defined in the Council's Local Plan policies as being key areas in terms of shopping function, containing a high proportion of retail use; protected Secondary Shopping frontages are defined as playing an important complementary shopping role, containing a mix of retail, non-retail and other services appropriate to a shopping frontage; the protected Other frontages are defined as playing a complementary shopping role - these frontages also contain a range of town centre uses. DMPD policies DMTS3-4 set minimum thresholds of 70% and 50% of A1 units being retained in core and secondary shopping frontages respectively and requires the remaining units to be an appropriate A class use, whilst policy DMTS5 protects other frontages, supports complementary uses and requires that any proposed use must be an appropriate town centre use.

## **Use Classes Order**

The use classes stated in the report are those identified in the Town and Country Planning (Use Classes) Order 1987, as amended. The A1 retail class is broken down into A1C (Convenience) units such as grocers, bakers, butchers, greengrocers, newsagents; A1D (Durable – also called comparison goods) such as clothes, electrical goods, furniture, DIY stores and A1S (Service) units such as hairdressers and photo processing shops. Vacant units are identified by their use class e.g. A1V is a vacant retail unit, A3V is a vacant restaurant/café and B1V is vacant office. Internet cafés are categorised as A1 in this report unless internet provision is ancillary to other uses. For example, a café with only a few computers would be classed as A3.

## **Permitted Development**

In more recent years, changes to permitted development rights have meant that fewer types of development now require planning permission. This includes change of use away from shops and related town centre uses to residential use and other uses such as schools and offices. At the same time, national policy requires that sufficient shopping facilities must be maintained to serve the needs of the local population and therefore certain permitted development rights for changes of use do not apply to identified key shopping parades -in Wandsworth

the protected Core and Secondary Shopping frontages, and Other frontages in town and local centres, and the Important Local Parades. The Council has also put in place [Article 4 Directions](#) to ensure that proposals affecting public houses and bars are subject to planning permission, and to restrict permitted development rights in the Core and Secondary Shopping frontages and the Important Local Parades to change from a shop (A1 use) to a financial and professional services (A2) use. These came into force in August 2017. There is also an Article 4 Direction in place to resist change of use from office (B1a) to residential, which would affect the Other frontages where B1a is an acceptable use, by introducing a residential use into a parade which is designed to support Core and Secondary Shopping frontages with complementary uses including those operating into the evening, and potential for future retail (A1) growth. This latter Article 4 Direction only came into force in May 2018. A degree of care must therefore be taken in interpreting policy performance shown in the survey results, as some changes of use may have occurred through permitted development.

### **Interpreting the survey results**

To improve the analysis of vacancy rates the surveys now monitor development activity of the units within the parades, as whilst these units are vacant, refurbishment, or being fitted out for new owners demonstrate an opposite and positive result of investor confidence through committed take up and/or investment in units within the parades. Further analysis of vacancies, such as the location and length of time a unit has been vacant will also take place as part of the Local Plan Review in order to provide reliable evidence and to better understand the economic trends taking place.

When making comparisons across protected frontages and between town centres, it is important to note that market stalls in the covered markets (Tooting Market and Broadway Market) which are included in the survey as protected Other frontages, are counted as individual units, operate under a single management regime, and the splitting up or combining of the units regularly takes place. The Southside and Putney Exchange indoor shopping centres in Wandsworth and Putney town centres respectively similarly operate under a single management regime but have been assigned protected frontage designations reflecting a point in time layout of units. Unlike individual units in traditional street locations, reconfigurations of these market units and of units within shopping centres can take place without requiring planning permission. This should be noted when interpreting the data and comparing results between the town centres.

The survey includes results from previous surveys since 2004 – this provides a more realistic picture of the policy performance and health of each centre, as the longer timeframe can ‘flatten out’ short term economic fluctuations, such as the 2008 financial crisis and current Brexit uncertainty. This will also identify the longer-term effects of the sectoral shift towards online shopping and growth of office and residential population in town centres and potentially any correlation between vacancies and CIL charges, rents and business rates.

## **Headline results - all town centres**

The town centres vary in size and have largely retained their level of retail use and low vacancy rates. The total number of units across all the protected frontages shows little change over the longer term, totalling 1443 units in 2018, compared to 1435 units in 2016, 1413 in 2014, and 1441 in 2004. The overall proportion of retail (A1) use across all the protected parades in all 5 town centres was 53% in 2018, slightly down from 57% in 2016, and in 2014, and 61% in 2004. Similarly, the combined vacancy rates across all the protected parades in all 5 town centres remains consistently low, at 9% in 2018, 8% in 2016, 6% in 2014 and 7 % in 2004. The combined retail (A1) vacancy rate was also low at 4% in 2018, compared to 5% in 2016, 4% in 2014 and 4% in 2004.

## **Headline results – Clapham Junction**

The overall proportion of retail (A1) use across all the protected frontages in Clapham Junction town centre has fallen slightly to 52% after remaining steady at 57% in 2016, and 2014. The combined vacancy rate (all uses) has also remained consistently low since at least 2004 – generally between 2-4% - and the 4% vacancy rate recorded in 2018 is notably lower than 7% in 2016 when 11 of the 21 total vacant units were undergoing refurbishment. Retail (A1) vacancy rates in Clapham Junction's protected frontages has remained low and reasonably steady over the longer term, varying between 2% in 2018, 4% in 2016, 2% in 2014 and 4% in 2012.

The overall proportion of retail (A1) use across all the protected frontages in Clapham Junction town centre has declined at 52% in 2018 compared to a steady 57-59% since 2004. This combination figure includes Other frontages, where A1 retail use is not protected in favour of seeking town centre uses which are complementary to Core and Secondary shopping frontages. The retail performance of individual parades varies widely and may be a function of rental/business rate differentials, footfall or the types of A1 uses occupied. For example, some types of retail use are buoyant, such as coffee bars, delicatessens and convenience retail - notably small format supermarkets. The combined policy performance of all Core and Secondary Shopping frontages in Clapham Junction remain strong, above the 70% and 50% thresholds for A1 units at 74% and 60% respectively. Other frontages also show a significant A1 retail presence at 35%, despite retention of A1 uses not being a policy requirement. Whilst the retail sector and national high street retailers are undergoing a period of restructuring, uncertainty and competition from online trading, traditional retailing remains healthy in Clapham Junction.

## **Food and Drink/Evening economy**

Whilst the retail sector and national high street retailers are undergoing a period of restructuring, uncertainty and competition from online trading, the food, drink and evening economy offer shows more resilience in Clapham Junction, increasing slightly to over a quarter (26%) of all uses.

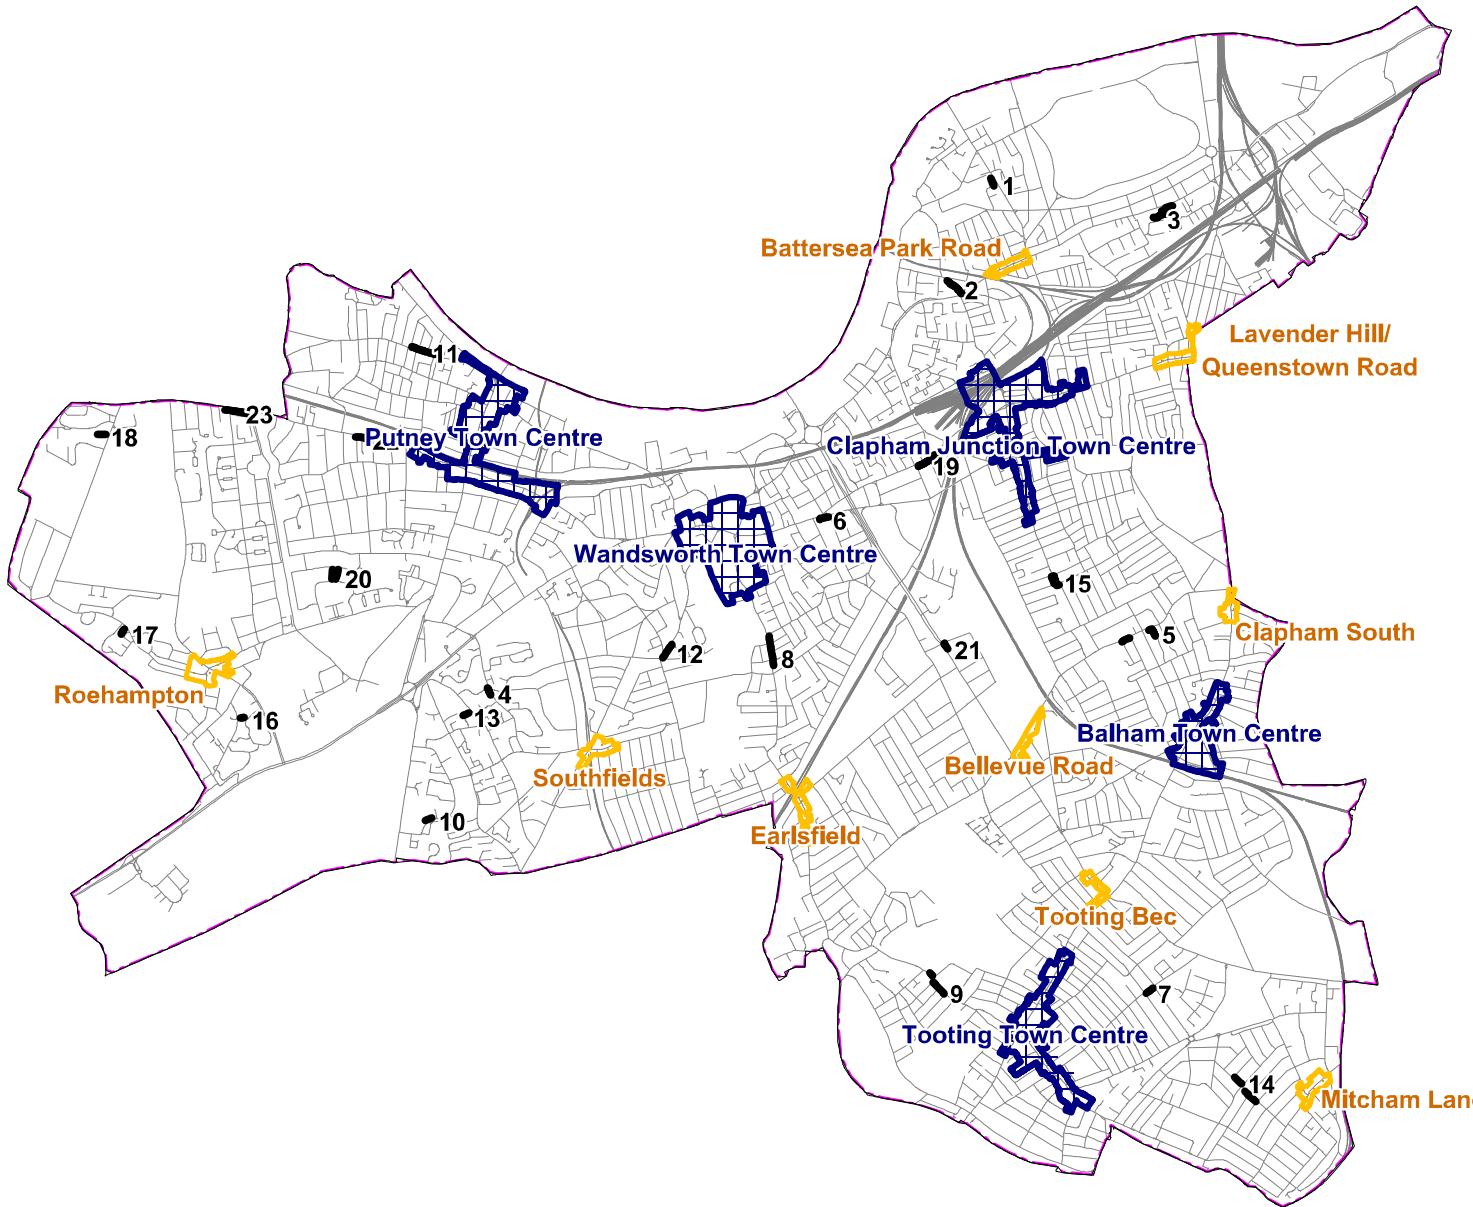

Food and drink, bars pubs (A3/4/uses) and hot food takeaway uses are recorded as a combined use in the overall performance tables which provides a snapshot of the performance of this sector, including the evening economy as a whole, and in comparison with the more traditional shopping role. Whilst many pubs have closed in the last decade, those that do remain tend to offer meals, making the distinction between A3 restaurants and A4 pubs less clear in practice. Food and drink uses can support town centres' vitality and resilience against sectoral shifts between high street shopping and online shopping, as they attract customers into the town centre/shopping parades and tend to have longer trading hours including Sundays and into the evening, being therefore a key part of the evening economy.

### **Local Plan review**

This report provides a snapshot of performance of the protected frontages and current Council policies DMTS3-5 which seeks to protect parades for retail (A1) and complementary uses. Updated evidence on retail needs, town centres policy and strategies will be carried out as part of the full review of the Local Plan which is currently underway. Public consultation and progress are recorded on the [Council website](#). This will consider the town centres hierarchy, changes to boundaries and protected frontages, mix of uses, and the current and emerging role of Battersea Power Station as a new centre and shopping destination.
