## **Introduction**

There are 5 town centres in the Borough: Balham, Clapham Junction, Putney, Tooting and Wandsworth. Surveys of all the town centres have been carried out on a biennial basis since 1988. The last survey was carried out in 2016. The survey collected information on all ground floor units within the protected frontages in the town centres. Details of the occupier, use and use class were collected enabling changes in the number of units and use class to be monitored over time. The town centre boundaries used in this report include all the shopping frontages as set out in the Council's adopted Local Plan, 2016.

The information is broken down into Core Shopping frontages, Secondary Shopping frontages and protected Other frontages. This format enables the role of each shopping frontage to be monitored. Protected Core Shopping frontages are defined in the Council's Local Plan policies as being key areas in terms of shopping function, containing a high proportion of retail use; protected Secondary Shopping frontages are defined as playing an important complementary shopping role, containing a mix of retail, non-retail and other services appropriate to a shopping frontage; the protected Other frontages are defined as playing a complementary shopping role - these frontages also contain a range of town centre uses. DMPD policies DMTS3-4 set minimum thresholds of 70% and 50% of A1 units being retained in Core and Secondary shopping frontages respectively and requires the remaining units to be an appropriate A class use, whilst policy DMTS5 protects Other frontages, supports complementary uses and requires that any proposed use must be an appropriate town centre use.

## **Use Classes Order**

The use classes stated in the report are those identified in the Town and Country Planning (Use Classes) Order 1987, as amended. The A1 retail class is broken down into A1C (Convenience) units such as grocers, bakers, butchers, greengrocers, newsagents; A1D (Durable – also called comparison goods) such as clothes, electrical goods, furniture, DIY stores and A1S (Service) units such as hairdressers and photo processing shops. Vacant units are identified by their use class e.g. A1V is a vacant retail unit, A3V is a vacant restaurant/café and B1V is vacant office. Internet cafés are categorised as A1 in this report unless internet provision is ancillary to other uses. For example, a café with only a few computers would be classed as A3.

## **Permitted Development**

Recent changes to permitted development rights have meant that fewer types of development now require planning permission. This includes change of use away from shops and related town centre uses to residential use and other uses such as schools. At the same time, national policy requires that sufficient shopping facilities must be maintained to serve the needs of the local population and therefore certain permitted development rights for changes of use do not apply to

identified key shopping parades -in Wandsworth these comprise the Core and Secondary shopping frontages, and Other frontages in town and local centres, and the Important Local Parades. The Council has put in place [Article 4 Directions](#) to ensure that proposals affecting public houses and bars are subject to planning permission, and to restrict permitted development rights in the core and secondary frontages and the Important Local Parades to change from a shop (A1 use) to a financial and professional services (A2) use. These came into force in August 2017. There is also an Article 4 Direction in place to resist change of use from office (B1a) to residential, which would affect the Other frontages where B1a is an acceptable use by introducing a residential use into a parade which is designed to support Core and Secondary Shopping frontages with complementary uses including those operating into the evening, and potential for future retail (A1) growth. This latter Article 4 Direction only came into force in May 2018. therefore a degree of care must be taken in interpreting policy performance shown in the survey results, as some changes of use may have occurred through permitted development.

### **Interpreting the survey results**

To improve the analysis of vacancy rates the surveys now monitor development activity of the units within the parades, as whilst these units are vacant, those that are being refurbished or fitted out for new owners demonstrate an opposite and positive result of investor confidence through committed take up and/or investment in units within the parades. Further analysis of vacancies, such as the location and length of time a unit has been vacant will also take place as part of the Local Plan Review in order to provide reliable evidence and to better understand the economic trends taking place.

When making comparisons across protected frontages and between town centres, it is important to note that market stalls in the covered markets (Tooting Market and Broadway Market) which are included in the survey as protected Other frontages, are counted as individual units, operate under a single management regime, and the splitting up or combining of the units regularly takes place. The Southside and Putney Exchange indoor shopping centres in Wandsworth and Putney town centres respectively similarly operate under a single management regime but have been assigned protected frontage designations reflecting a point in time layout of units. Unlike individual units in traditional street locations, reconfigurations of these market units and of units within shopping centres can take place without requiring planning permission. This should be noted when interpreting the data and comparing results between the town centres.

The survey includes results from previous surveys since 2004 – this provides a more realistic picture of the policy performance and health of each centre, as the longer timeframe can ‘flatten out’ short term economic fluctuations, such as the 2008 financial crisis and current Brexit uncertainty. This will also identify the longer-term effects of the sectoral shift towards online shopping and growth of office and residential population in town centres and potentially any correlation between vacancies and CIL charges, rents and business rates.

## **Headline results - all town centres**

The town centres vary in size and have largely retained their level of retail use and low vacancy rates. The total number of units across all the protected frontages shows little change over the longer term, totalling 1443 units in 2018, compared to 1435 units in 2016, 1413 in 2014, and 1441 in 2004. The overall proportion of retail (A1) use across all the protected parades in all 5 town centres was 53% in 2018, slightly down from 57% in 2016, and in 2014, and 61% in 2004. Similarly, the combined vacancy rates across all the protected parades in all 5 town centres remains consistently low, at 9% in 2018, 8% in 2016, 6% in 2014 and 7 % in 2004. The combined retail (A1) vacancy rate was also low at 4% in 2018, compared to 5% in 2016, 4% in 2014 and 4% in 2004.

## **Headline results – Wandsworth**

The protected frontages in Wandsworth town centre consist of Core Shopping frontages and protected Other frontages only and apart from Sainsbury's in Garratt Lane, all the Core Shopping frontages are entirely within the indoor Southside shopping centre. Regeneration over recent years has reconfigured the shopping centre and the units within it therefore it is not possible to make a direct comparison with previous years' survey results and vacancy rates in the recent past have reflected the complete remodelling of the interior. This is reflected in the total number of units in the protected frontages which has reduced markedly in recent years from 170 units in 2012, to 143 in 2016, with a slight increase to 149 in 2018. The overall proportion of retail (A1) use across all the protected parades in Wandsworth town centre has remained relatively constant at 61% in 2018 and 2016, compared to 63% in 2014, and 64% in 2004. The combined vacancy rate of 9% is the same as 2016 and 2014, but this is significantly lower than previous years and since at least 2004 when 16% were vacant. Retail (A1) vacancy rates in Wandsworth's protected frontages is the lowest recorded at 4% in 2018 and 2016, and is an improvement on the 6% of A1 units recorded as vacant in 2014. On-going investment and reconfiguration of Southside has also included the creation of new units fronting onto Garratt Lane/Wandsworth High Street frontages, reinstating street frontages from a former inward facing shopping mall. Consideration of these new units as potential new protected shopping frontages will take place as part of the Local Plan Review.

## **Food and Drink/Evening Economy**

Wandsworth town centre shows a reliable food, drink and evening economy offer in the protected frontages, representing 22% (A3/A4/A5) of all units in the protected frontages and with a low vacancy rate of 4% for these uses. The number of units in A3/4/5 use has remained steady at around 33-36 units. Food and drink uses, bars, pubs and hot food takeaways (A3-5 uses) are recorded as a combined use in the overall performance tables which provides a snapshot of the performance of this sector, including the evening economy as a whole, and in comparison with the more traditional shopping role. Whilst many pubs have closed in the last decade, those that do remain tend to offer meals, making the distinction between A3 restaurants and A4 pubs less clear in practice. Whilst the

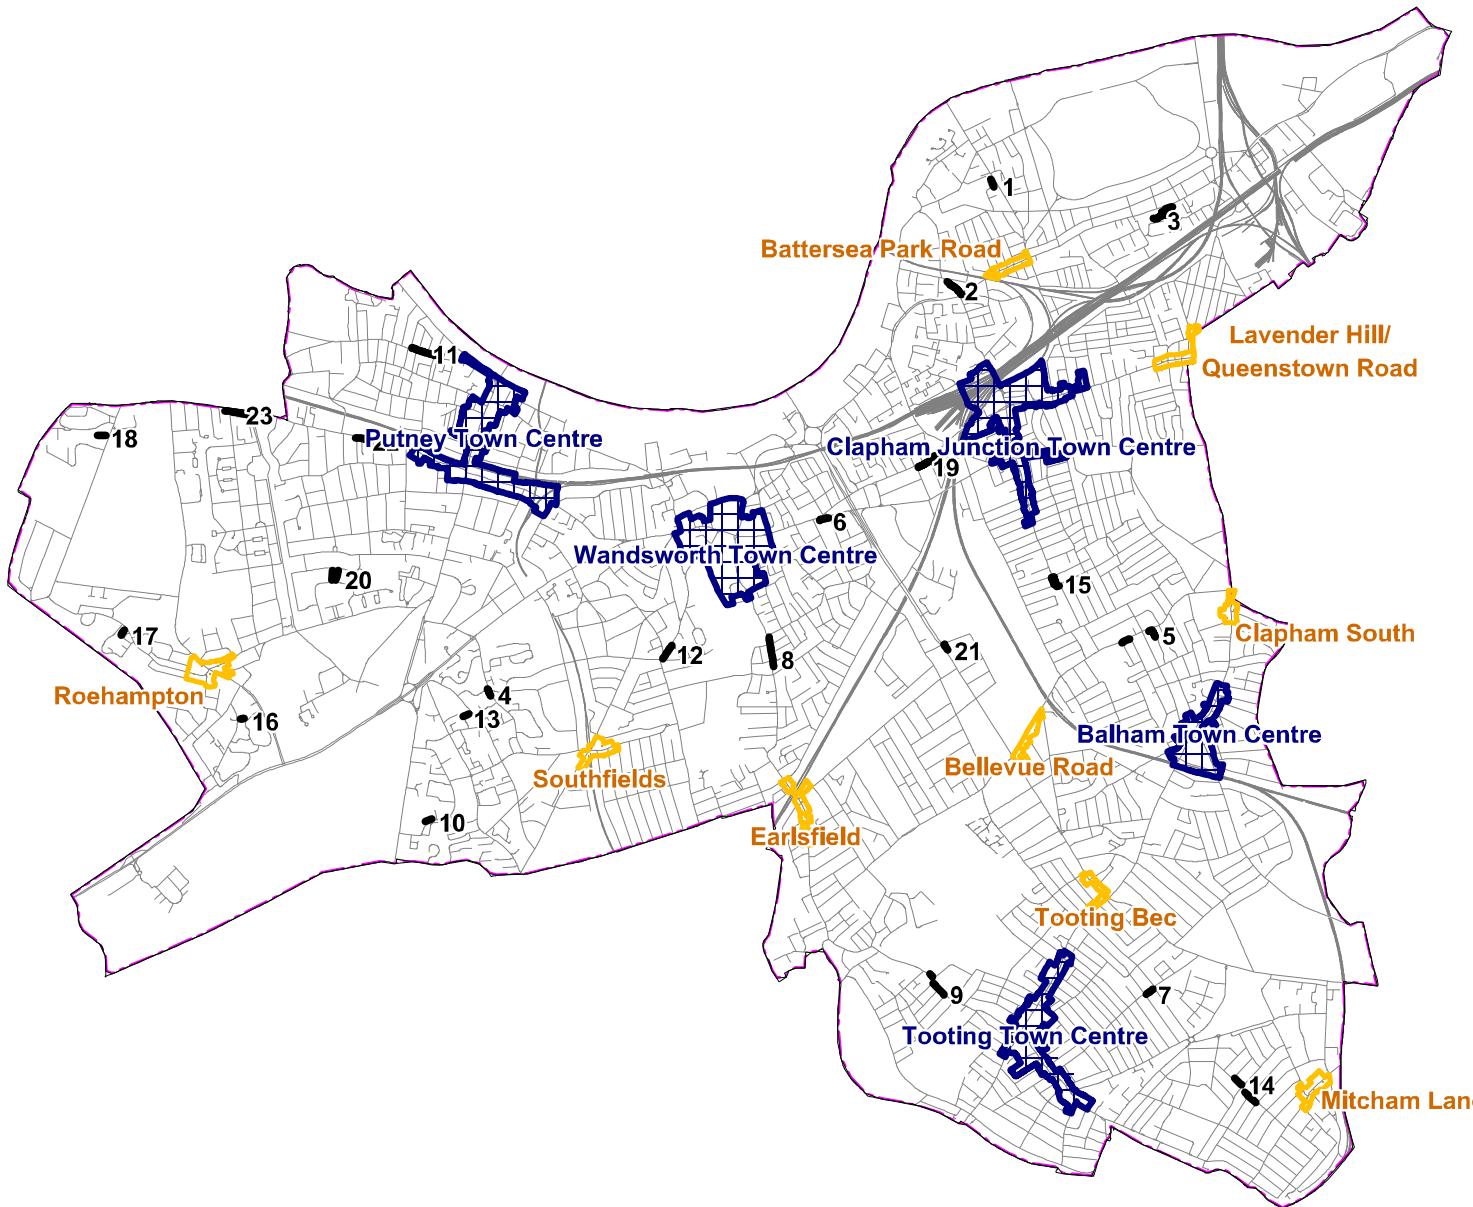

retail sector and national high street retailers are undergoing a period of restructuring, uncertainty and competition from online trading, the food, drink and evening economy offer can increase footfall and therefore increasing spend into the town centre extending into the evenings. This has the potential to offer more resilience and can support town centres vitality and viability, as they attract customers into the town centre and towards the protected frontages, and tend to have longer trading hours including Sundays and into the evening, comprising therefore a key part of the evening economy.

### **Local Plan review**

This report provides a snapshot of performance of the protected frontages and current Council policies DMTS3-5 which seeks to protect parades for retail (A1) and complementary uses. Updated evidence on retail needs, town centres policy and strategies will be carried out as part of the full review of the Local Plan which is currently underway. Public consultation and progress are recorded on the [Council website](#). This will consider the town centres hierarchy, changes to boundaries and protected frontages, mix of uses, and the current and emerging role of Battersea Power Station as a new centre and shopping destination.

The units in the Southside Shopping Centre were incorrectly numbered prior to the 2014 Survey.

Therefore the sum of units in previous years shown above may not reflect the total due to the re-numbering and re-ordering of units.

The total numbers remain unchanged to allow comparison.

The units in the Southside Shopping Centre were incorrectly numbered prior to the 2014 Survey. Therefore the sum of units in previous years shown above may not reflect the total due to the re-numbering and re-ordering of units. The total numbers remain unchanged to allow comparison. The increase in the total number of units between 2008 and 2010 is due to the redesignation of Southside Shopping Centre in 2010. The decrease in the total number of units between 2012 and 2014 is due to the redevelopment of the Shopping Centre.

All percentages are of the total number of units.

The first floor was re-developed and re-opened in 2004.

JD Sports had been moved to unit 24 at the time of the 2016 survey. The vacant unit where JD Sports was, had been amalgamated with unit 5 at the ground floor (Waterstones).

Unit 5 has been mentioned before as part of the Core Frontages so it will not be taken into account on the total number of units in this section in order to avoid repetition.
