

# Clapham Junction Urban Heart Masterplan

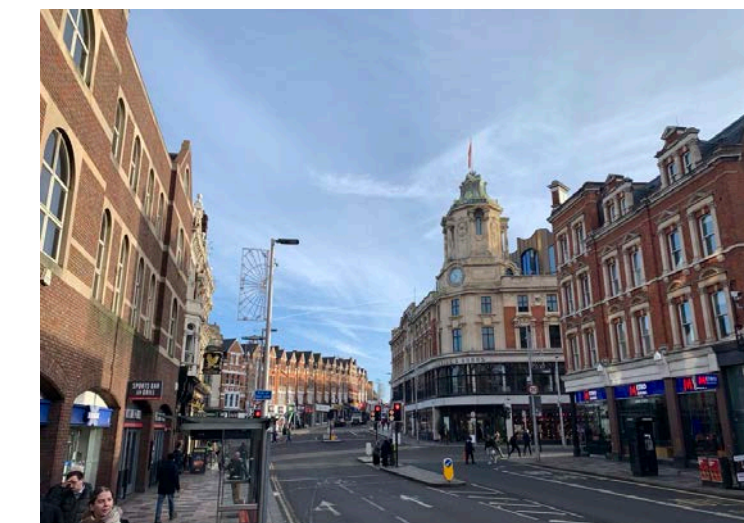

Site Plan showing station and masterplan area in wider context

Urban realm vision

The Clapham Junction Urban Heart Masterplan project aims to develop a strategic framework for the redevelopment of the station and the wider area to benefit the local community and establish Clapham Junction as a vibrant location enjoyed by residents, visitors, and those passing through. The station is the key to unlocking the masterplan, with the potential to improve connectivity and pedestrian links between the surrounding neighbourhoods, to act as a gateway at the heart of the community and a catalyst for growth in the area. The focus of Stage 1 is to overcome the challenges the station presents and assess the opportunity associated with the station to allow for the future potential development of a masterplan that unlocks the local development sites to benefit the wider community.
